‘Mersey’ Superfold Industrial Folding Shutter Doors

Our ‘Mersey’ Superfold Sliding Folding Shutter is the most popular industrial sliding shutter on the market and is used on sites from small railway station openings up to the larger openings in some of the country’s shipyards.

The heavy duty design and our refusal to lower the quality ensure that the product is now the leading seller within this market in the UK.

Similar to roller shutter doors, each Superfold is manufactured for a specific application and sizes range from the smallest doors for dumb waiters to full size warehouse doors of 10 - 15m.

The unique design of the folding shutter gives you increased security as they can withstand some forms of ram raiding which would destroy roller shutters or sectional overhead doors. They also provide increased wind resistance on larger openings due to rigidity of doors.

Standard Features:

- **Manual or electrical operation**
- **230mm & 305mm leaves**
- **Rolled or heavy duty top tracks**
- **Hasp & staple locking**
- **Galvanised Finish**
